

The map collection of the Keene Valley Library Association is located in the library's Alpine Room, in Keene Valley. Containing more than 360 maps, the collection includes maps of local interest as well as national and international maps.

There are 2 drawers of United States Geological Survey maps; including series from the 1800's through the 1960's. These maps provide broad coverage of the Adirondack Region and northern New York. Maps of other American mountain ranges are included

The regional collection includes an aerial photograph of Dix Mountain and commercially produced maps created for mountain climbers, hikers and tourists.

The collection of US Geological Survey maps includes areas of North America, western Canada and detailed maps of Yosemite National Park.

There are nearly two drawers of maps from throughout the world, including a map of Tibet, multiple maps of the Alps and numerous maps of the Himalayas. There is also a pre-World War II map of Europe.

The complete American Geographical Society Antarctic Folio Series is included in the collection, as are original photographs of a 1953 Mt. Everest expedition.

There are 2 original surveyor maps of the Keene Valley area and a detailed map of the 2007 proposed Keene Affordable Housing Subdivision created by Thomas LaBombard.

There is one drawer of three-dimensional maps covering a portion of the eastern United States including the Albany, New York area, Boston, Massachusetts, Maine and portions of New Hampshire and Vermont.

There is a representative sample of National Geographic maps of oceans and continents as well.
